- Page 2-33: Team Projections
- Page 34-55: QB, RB, WR, TE and IDP positional projections
- Page 56-58: Category Leader projections
- Page 59: Projected standings, playoff teams and next April's draft order
- Page 60: Projected Strength of Schedule
- Page 61: Unit Grades

- Page 72: Current Coaching Staffs
- Page 73-80: Projected Starters

Understanding the graphics:

- *The numbers shown are projections for the 2023 NFL regular season (Weeks 1-18).
- *Some columns may not seem to be adding up correctly, but this is simply a product of rounding. The totals you see are correct.
- *Most players max out at 16 projected games played. This is related to injury rates, as a majority of players will not make it through the full 17 games.
- *Looking for sortable projections by position or category? Check out the projections tab inside the ESPN Fantasy game.
- *'Team stat rankings' is where each team is projected to finish in the category that is shown.
- *'Unit Grades' is not related to fantasy football and is an attempt at an objective ranking of each team at 10 key positions. The overall grades are weighted based on positional importance. The scale is 4.0 (best) to 0.1 (worst). A full rundown of Unit Grades can be found on page 61.
- *'Strength of Schedule Ranking' is based on 2023 rosters (not 2022 team record). '1' is easiest and '32' hardest. See the full list on page 60.
- *Note that prior to the official release of the NFL schedule (generally mid May), the schedule shown includes the correct opponents, but the order is simulated.
- *Have a question or notice an error? Contact Mike Clay on Twitter @MikeClayNFL
